Fall Height: 84"

Post Diameter: 3.5"

ADA Compliant 

Elevated: 6 components

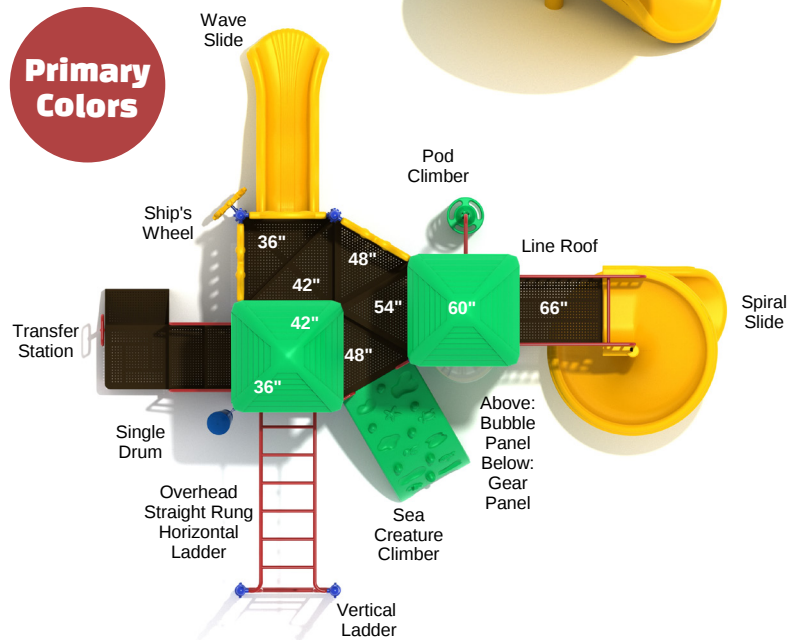

Ground Level: 4 components

Primary Colors

Neutral Colors

MEETS NATIONAL STANDARDS FOR:

ASTM F1487-17

CPSC GUIDELINES #325

Product Description

Children are guaranteed to have a blast enjoying all the activities and features of Cooper's Neck, developing their physical fitness as well as their imagination and creativity.

There are multiple ways to get onto the play platforms. The easy route is via the Transfer Station but there's also the Pod Climber which develops climbing abilities, the Sea Creature Climber for added fun, but the most challenging way is the Overhead Straight Rung Horizontal Ladder for classic monkey bar action. There are two ways to exit Cooper's Neck, either by the smaller Wave Slide or the curvy and swervy Spiral Slide which is sure to become a favorite. Aside from the main physical elements of the structure, children can also develop their creative skills whether they're looking through the Bubble Window Panel on their undersea adventure, fixing their rocket ship with the interactive Gear Panel, banging on the Single Drum, or charting a new adventurous course across the Atlantic Ocean with the Ship's Wheel.
